

COM814 Project – Final Marking Sheet 2015-16

Student:

Anne McAuley

Date:

07/09/2016

Examiner:

Dr G Trombino

Supervisor / 2nd Marker (delete)

Areas	Criteria	Excellent	Good	Satisfactory	Borderline	Fail	N/A	Commentary
40	From Dissertation							Excellent software development skills have been demonstrated throughout the life of this project. Anne is a very responsible, organised and competent developer. While somewhat lacking in detail in terms of the requirement specifications reported in this write-up, the Initial report and Analysis and Design report had covered them in sufficient detail. From a simple premise, Anne has demonstrated that this idea can be very elegantly executed without trivialising the complexities of developing in Android following best practice and techniques recommended by the industry experts. This is really an exemplar piece of work.
	• problem definition / requirements specification		X					
	• systematic approach to development	X						
	• testing process documented		X					
	From Demonstration							
	• robustness of software	X						
	• range of functionality	X						
	• data validation	X						
	• usability of HCI	X						
	• consistency with stated functionality of software	X						
	• understanding of software features	X						
	From Viva							
• understanding of software technology used	X							
• understanding of software features implemented	X							
17	From Dissertation							Well written document, with good structure and organisation. Throughout both the demonstration and viva, Anne's mastery of all aspects of the project, including the wider context and the technologies used, were clearly evident. She was very eloquent and confident in all her responses.
	• documentation structure and completeness	X						
	• readability	X						
	From Demonstration							
	• organized and structured	X						
	• response to questions	X						
	From Viva							
	• composure & coherence	X						
• response to questions	X							
17	From Dissertation							Decisions taken are well justified. Review of the market and discussion of the design philosophy (UI and system architecture) were excellent. Anne is well aware of the limitations of the system and how it could be improved.
	• justification for decisions made throughout project	X						
	• awareness of related work & technologies	X						
	• thoroughness of evaluation process		X					
	From Viva							
	• ability to discuss limitations of work	X						
• discuss potential improvements	X							

Areas	Criteria	Excellent	Good	Satisfactory	Borderline	Fail	N/A	Commentary
Professional Engagement (10%) <div style="border: 1px solid black; width: 40px; height: 40px; margin: 10px auto; text-align: center; font-weight: bold;">9</div>	From Supervisor							
	• took initiative as appropriate	X						Anne has conducted herself in a very professional manner from the initial meeting. It's been a pleasure to mentor her through this year and has both met regularly with me and responded well to suggestions.
	• met regularly with supervisor	X						
	• responded to suggestions	X						
• kept satisfactory project log		X						
Total (100%) <div style="border: 1px solid black; width: 40px; height: 40px; margin: 10px auto; text-align: center; font-weight: bold;">83</div>	Agreed Total <div style="border: 1px solid black; width: 40px; height: 40px; margin: 10px auto; text-align: center; font-weight: bold;">85</div>	Scaled (70%) <div style="border: 1px solid black; width: 40px; height: 40px; margin: 10px auto; text-align: center; font-weight: bold;">60</div>		Earlier Components (30%) <div style="border: 1px solid black; width: 40px; height: 40px; margin: 10px auto; text-align: center; font-weight: bold;">24</div>			Overall Mark <div style="border: 1px solid black; width: 40px; height: 40px; margin: 10px auto; text-align: center; font-weight: bold;">84</div>	
Overall Comments <p>Exemplar work of excellence. Anne has researched and adhered to best practices not only in terms of the initial Project Management, but also through her chosen methodology, analysis, design and implementation. She has produced an initial prototype for a solution which is modular and scalable, clearly addressing the initial problem proposed to her. The very few shortcomings on the initial prototype of the project revolve around available time to develop and feedback from testers. However, deeper issues remain to be addressed in the larger scope of the project and Anne is so critically aware of them that proposes a complete overhaul of the system architecture for future iterations, demonstrating the technical confidence gained while developing the project. She has clearly impressed the examination panel with her confidence and professionalism.</p>								

Mark Range Guidance

Excellent: 70 - 100:

Here the candidate must demonstrate clear excellence across all aspects of the background research, project report, software/hardware implementation, oral presentation and project management. There must be evidence of originality and creativity, indicated by novel insight, and clearly supported by a high level of initiative, motivation and independent work. The work must be at a level which suggests that the student has the ability to pursue doctoral research. The student must impress the examiners with the elegance of his/her conception of the solution to the problem.

Good: 60 - 69:

To achieve this level there must be significant evidence of wide and deep study in relevant material and texts. This must be placed in its wider academic and research context. There must be an imaginative approach, a balanced treatment of possibilities and comprehensive thinking. The expression of a solution must exhibit an understanding of its relation to the total process. All or most of the project report, software/hardware implementation, oral presentation and project management are considered at least adequate with some parts excellent although there will likely be a lack of creativity or innovative flair.

Satisfactory: 50 - 59:

At this level the candidate has performed a study of the given project but there is not much evidence of in-depth work. All or most of the project report, software/hardware implementation, oral presentation and project management are considered adequate although some or all are not covered in depth. Requirements analysis might include user requirements but lack non-functional requirements. Testing and evaluation might have been conducted, but not as part of an overall test strategy which incorporates formal recording of results. The software/hardware implementation may be available but with a number of flaws and deficiencies and possibly an inadequate coverage of the original specification.

Borderline: 45 - 49:

At this level there has been a reasonable attempt to complete the project overall but either the software/hardware produced and/or the dissertation have fallen below minimum standards. The work is considered redeemable with reasonable effort.

Fail: 0 - 44:

Here the student has failed to achieve a satisfactory level of performance in one or more areas to a level where the work is considered irredeemable. The project area is insufficiently understood, the results untenable, or the written and/or oral presentation of the work is significantly flawed. There may be no software or hardware demonstration. There may have been a complete lack of background research, leading to a serious lack of understanding of the requirements or methodology appropriate to the topic under consideration. All or most of the project report, software/hardware demonstration and oral presentation and project management are inadequate. The supervisor might have found the candidate not attending regular meetings or only providing work towards the end of the project rather than consistently throughout the period.
