

COM814 Project – Final Marking Sheet 2015-16

Student:

Katherine McCann

Date:

12 October 2016

Examiner:

Adrian Moore

2nd Marker

Areas	Criteria	Excellent	Good	Satisfactory	Borderline	Fail	N/A	Commentary
28	From Dissertation							<p>The application structure is slightly confused in its scope and usability – the core function is in managing a shopping list and store cupboard for a set of recipes, but only 2 recipes are provided in the database.</p> <p>The ability to add a new recipe to the collection would enhance the usability of the application</p>
	• problem definition / requirements specification		✓					
	• systematic approach to development		✓					
	• testing process documented			✓				
	From Demonstration							
	• robustness of software				✓			
	• range of functionality				✓			
	• data validation				✓			
	• usability of HCI				✓			
	• consistency with stated functionality of software		✓					
	• understanding of software features		✓					
From Viva								
• understanding of software technology used			✓					
• understanding of software features implemented			✓					
13	From Dissertation							<p>Document begins with a well-researched discussion of food waste.</p> <p>Excellent presentation style – engaging and articulate</p> <p>There is sometimes a tendency to defend a poor design decision – rather than explore potential alternatives.</p>
	• documentation structure and completeness		✓					
	• readability		✓					
	From Demonstration							
	• organized and structured	✓						
	• response to questions			✓				
	From Viva							
	• composure & coherence	✓						
• response to questions			✓					
12	From Dissertation							<p>The background study is comprehensive and well presented – but the set of functional requirements produced is light.</p> <p>The app is not usable in its current form – although this was acknowledged in the conclusion of the presentation</p>
	• justification for decisions made throughout project			✓				
	• awareness of related work & technologies	✓						
	• thoroughness of evaluation process		✓					
	From Viva							
	• ability to discuss limitations of work			✓				
• discuss potential improvements			✓					

Areas	Criteria	Excellent	Good	Satisfactory	Borderline	Fail	N/A	Commentary
Professional Engagement (10%) <div style="border: 1px solid black; width: 40px; height: 40px; margin: 0 auto; text-align: center; line-height: 40px;">8</div>	From Supervisor							
	• took initiative as appropriate							
	• met regularly with supervisor							
	• responded to suggestions							
	• kept satisfactory project log							
Total (100%)	Agreed Total	Scaled (70%)		Earlier Components (30%)			Overall Mark	
<div style="border: 1px solid black; width: 40px; height: 40px; margin: 0 auto; text-align: center; line-height: 40px;">61</div>	<div style="border: 1px solid black; width: 40px; height: 40px; margin: 0 auto; text-align: center; line-height: 40px;">62</div>	<div style="border: 1px solid black; width: 40px; height: 40px; margin: 0 auto; text-align: center; line-height: 40px;">43.4</div>		<div style="border: 1px solid black; width: 40px; height: 40px; margin: 0 auto; text-align: center; line-height: 40px;">22.95</div>			<div style="border: 1px solid black; width: 40px; height: 40px; margin: 0 auto; text-align: center; line-height: 40px;">66</div>	
Overall Comments <p>The dissertation is generally well written – providing a clear justification for the need for this application. However, the background and analysis chapters suggest that the focus of the application is 'food waste' – but the design appears to be a 'simple' recipe manager. There is no functionality that explicitly records or measures waste.</p> <p>The app is not viable in its current form. The database architecture is not the most appropriate for the intended functionality and would not scale well to a large collection of recipes and ingredients.</p> <p>Questions: Database design – what is the relationship between the 'ingredients' and 'stock' tables? Are there no connections between the 'shopping list' table and 'stock' (or 'ingredients')?</p>								

Mark Range Guidance

Excellent: 70 - 100:

Here the candidate must demonstrate clear excellence across all aspects of the background research, project report, software/hardware implementation, oral presentation and project management. There must be evidence of originality and creativity, indicated by novel insight, and clearly supported by a high level of initiative, motivation and independent work. The work must be at a level which suggests that the student has the ability to pursue doctoral research. The student must impress the examiners with the elegance of his/her conception of the solution to the problem.

Good: 60 - 69:

To achieve this level there must be significant evidence of wide and deep study in relevant material and texts. This must be placed in its wider academic and research context. There must be an imaginative approach, a balanced treatment of possibilities and comprehensive thinking. The expression of a solution must exhibit an understanding of its relation to the total process. All or most of the project report, software/hardware implementation, oral presentation and project management are considered at least adequate with some parts excellent although there will likely be a lack of creativity or innovative flair.

Satisfactory: 50 - 59:

At this level the candidate has performed a study of the given project but there is not much evidence of in-depth work. All or most of the project report, software/hardware implementation, oral presentation and project management are considered adequate although some or all are not covered in depth. Requirements analysis might include user requirements but lack non-functional requirements. Testing and evaluation might have been conducted, but not as part of an overall test strategy which incorporates formal recording of results. The software/hardware implementation may be available but with a number of flaws and deficiencies and possibly an inadequate coverage of the original specification.

Borderline: 45 - 49:

At this level there has been a reasonable attempt to complete the project overall but either the software/hardware produced and/or the dissertation have fallen below minimum standards. The work is considered redeemable with reasonable effort.

Fail: 0 - 44:

Here the student has failed to achieve a satisfactory level of performance in one or more areas to a level where the work is considered irredeemable. The project area is insufficiently understood, the results untenable, or the written and/or oral presentation of the work is significantly flawed. There may be no software or hardware demonstration. There may have been a complete lack of background research, leading to a serious lack of understanding of the requirements or methodology appropriate to the topic under consideration. All or most of the project report, software/hardware demonstration and oral presentation and project management are inadequate. The supervisor might have found the candidate not attending regular meetings or only providing work towards the end of the project rather than consistently throughout the period.
